Richard J. Machold has 24 years' experience across multiple industries and disciplines, including business risk management, process design and improvement, change facilitation, forensic accounting and strategic planning. Rick is currently Head of Enterprise Risk at Invesco Ltd. and has global responsibility for the company's enterprise risk management efforts. As administrative coordinator and member of Invesco's Corporate Risk Management Committee, he oversees the continuing development of the company's ERM framework, tools and practices. As one of the largest independent global investment managers, Invesco Ltd. is dedicated to helping people worldwide build their financial security. Rick's background is primarily in public accounting and consulting, having served as a Partner in PricewaterhouseCoopers Global Risk Management Solutions practice. His clients have included the Centers for Disease Control (CDC), the New York Yankees Partnership, Wyeth-Ayerst, Ryder System Inc., and NCR.
